Faculty of Medicine and Dentistry  
Pomeranian Medical University in Szczecin  
______________________________________________________

To the Students of the Dentistry Faculty 1\textsuperscript{st}, 2\textsuperscript{nd}, 3\textsuperscript{rd}, 4\textsuperscript{th} year in the academic year 2019/2020

English Program

Dear Students,

Due to the current epidemiological situation all over the Europe and existed ban for traveling, a special regulation for the English Program students has been issued by the Rector of PMU under the Deans’ of the Faculty of Medicine and Dentistry recommendations:

- All the classes are to be continued till the end of the didactic period, with accordance to the 19/20 academic year regulations, in the system of distance learning.
- All the exams are to be taken online.
- All the subjects required phantoms activities, as well as clinical classes with patients, are to be completed in the end of September and October at the beginning of the 20/21 academic year.
- The students receive a permission to deliver confirmations about summer practical training for the current academic year till September 2021.

On daily basis the students are required to stay at home and follow the university schedule; keep the deadline for the required tasks given by the respective tutors; check the emails twice a day; log in to the Virtual Dean’s Office and Moodle Platform. Please use this time for the constant efforts to improve your theoretical knowledge.

Each Department is obliged to establish the way of receiving the credit for each conducted subject. The University Didactics have already established the way of testing the students.

Same way as previously (with the help of the Group Leaders) we shall inform you about any new updates. The students are kindly required to check the web page frequently:  
https://www.pum.edu.pl/english/deans-office/announcements

We understand that during these extraordinary period of time studying medicine becomes more challenging. Our decision, however difficult to undertake, reconsidered both positive and negative impacts for the students, but also takes the most important issue as a priority - students health and wellbeing.

Yours sincerely,

PRODZIEKAN  
Wydziału Medycyny i Stomatologii  
Pomorskiego Uniwersytetu Medycznego w Szczecinie

dr hab. n. med. Aleksandra Gawlikowska-Sroka
