SYLLABUS of the MODULE (SUBJECT) General Information

Module title: Histology, Embryology and Cytology	
Module type	Obligatory
Faculty PMU	Faculty of Medicine and Dentistry
Major	Dentistry
Level of study	long-cycle Master's degree studies
Mode of study	full-time studies provided in English Language
Year of studies, semester	Year 1, semester 1 and 2
ECTS credits (incl. semester breakdown)	8 (3 / 5)
Type/s of training	Lectures: 20h (I semester: 12h, II semester: 8h) Seminars: 8h (I semester: 4h, II semester: 4h) Practical: 48h (I 24 semester: h, II semester: 24h) Summary 76 hours
Form of assessment*	<input checked="" type="checkbox"/> final examination <input checked="" type="checkbox"/> test: I term, I re-take <input checked="" type="checkbox"/> practical <input checked="" type="checkbox"/> oral: II re-take
Head of the Department/ Clinic, Unit	prof. dr hab. Barbara Wiszniewska

Detailed information

Module objectives:		<p>Histology is one of the basic fields of medicine. The area of interest is the microscopic of the human body that can be studied using the optical devices including all kinds of microscopy. The purpose of the teaching of histology and cytology is to provide a knowledge on the structure and function of cells, structural organization of tissues, entire systems and particular organs in the human body. The knowledge would be necessary for the farther study of the next subjects including physiology, biochemistry, immunology, pathophysiology and pathology. The understanding of ultrastructure of various cell types and molecular mechanisms in their organelle would be helpful to understand the etiology of diseases as well as cellular and sub-cellular mechanisms of medications and toxic agents. Moreover, learning the histology and cytology facilitates to understand relationships between the basic science in medicine and clinical subjects. The aim of the human embryology course is to describe and explain complex processes that occur during human embryo and fetus development. Additionally, basic embryological development of the face, neck, oral cavity, teeth and pharynx as well as of the most common orofacial birth defects.</p>
Prerequisite /essential requirements	Knowledge	Acquire the essential elements of the organization of human tissues. The morphology and function of particular tissues and organs. The human embryo and fetal development, development of the crucial organs, including anomalies.
	Skills	Handling of light microscope with immersion
	Competences	The ability of self-education and group work

Description of the learning outcomes for the subject /module			
No. of learning outcome	Student, who has passed the (subject) knows /is able to /can:	SYMBOL (referring the standards)	Method of verification of learning outcomes*
W01	demonstrates knowledge of human body structures: cells, tissues and systems with particular regard to stomatognathic system	A.W1.	W, S, K, O, PS EPR, ET – I term and I re-take, EU – II re-take
W02	explains development of organs and entire body with particular regard to masticatory system	A.W2.	W, S, K, O, PS EPR, ET – I term and I re-take, EU – II re-take
W03	understands role of nervous system for functions of certain organs	A.W4.	W, S, K, O, PS EPR, ET – I term and I re-take, EU – II re-take
W04	knows and understands functional importance of certain organs and systems in synthetic manner	A.W5.	W, S, K, O, PS EPR, ET – I term and I re-take, EU – II re-take
U01	can operate optic microscope and is able to apply of immersion and recognize histological structures corresponding to organs and tissues using microscope images as well as explain and interpret structures thereof, and interpret relationship between structure and function of cells, tissues and organs	A.U2.	S, O, PS, EPR
K01	is ready to see and recognize his/her own limitations, and to self-assess deficits and educational needs	K.5.	S, O, PS, EPR
K02	is ready to use objective sources of information	K.7.	W, O, S, K, PS, EPR, ET – I term and I re-take, EU – II re-take
K03	is ready to formulate conclusions from his/her own measurements or observations	K.8.	O, S, PS, EPR

Booklist

Obligatory literature:

1. Junqueira's Basic Histology: Text and Atlas, Fifteenth Edition.
2. Before we are born. Essential of Embryology and Birth defects. Keith L. Moore, T.V.N. Persaud, Mark G. Torchia 8th edition 2013.
3. Materials prepared by tutors.

Supplementary literature:

1. Leslie P. Gartner, Textbook of Histology.
2. T.W. Sadler: Langman's medical embryology. Thirteenth edition.
