After 5th year Student of PMU is obligated to have:

- practical training in the Gynecology and Obstetrics Department for 60 hrs.
- practical training in the Intensive Care Unit (ICU) for 60 hrs.

Head of the Hospital Department or designated Supervisor settles a detailed plan of summer training (student's duties) and exercises ongoing supervision over the Student's work. Student's Supervisor should be a qualified professional physician. To the extent possible, Student should take part in each physician's activity.

Absence from work could be justified only by illness. Absence lasting 1-week or more means the prolongation of summer training term for the corresponding period of time.

During the training duty student is shadowing the hospital doctor on duty in all occupational functions (treat patients in the emergency room, perform one's duties as a medicine emergency assistance).

Completed summer training is confirmed by Supervisor and signed by the Head of the Hospital Department. Student will get 4 ECTS points for completed summer clerkship.

Program of student's practice at Gynecologic and Obstetrical Unit.

- Organization of gynecological and obstetrical admission room, gynecological unit, obstetrical unit, delivery ward. Admission of a parturient. Nursing a woman in labour. Completing of proper documentation.
- Labour progression monitoring, assessment of parturient and fetus health condition, proper documentation of labour.
- Assistance in delivery, episiotomy and suturing of perineum under supervision of physician. Assessment of placenta after delivery.
- Principles of handling of medical devices used in obstetrical unit (assessment of fetal heart rate, cardiotocography, principles of ultrasound examination).
- Subserving in cesarean section.
- Principles of gynecological assessment.
- The surgical treatment in gynecological patient. Assistance in gynecological surgery.
