

IIIrd Faculty of Dentistry

Winter semester		Summer semester	
1	Principles of general pharmacology	1	Non-opioid analgesics.
2	Drugs acting on peripheral nervous system. Part 1 (parasympathetic)	2	Psychotropic drugs – introduction. Antidepressants. Antipsychotic drugs.
3	Drugs acting on peripheral nervous system. Part 2 (sympathetic agonists)	3	Antiepileptic drugs. Anxiolytic drugs. Hypnotic drugs.
4	Drugs acting on peripheral nervous system. Part 3 (sympathetic antagonists)	4	Summary
5	Local anesthetics.	5	Drugs affecting coagulation, antiplatelet drugs. Drugs used in the treatment of anemia.
6	Autacoids. Antiemetic drugs.	6	Drugs for GI tract (peptic ulcer disease, diarrhea, constipation)
7	Summary	7	Drugs used in respiratory tract (asthma, COPD, expectorants, cough suppressants)
8	Antimicrobial agents – principles.	8	Summary
9	Antimicrobial agents (beta-lactams, glycopeptides, polymyxins)	9	Drugs for coronary heart disease. Hypotensive agents.
10	Antimicrobial agents (aminoglycosides, tetracyclines, macrolides, lincosamides, quinolones, sulphonamides)	10	Diuretic agents and other drugs acting on vascular systems. Hypolipemic drugs.
11	Antimicrobial agents (antifungal drugs, antiviral drugs, antiparasitic drugs)	11	Antiarrhythmic drugs. Inotropic drugs.
12	Immunosuppressive drugs. Biologic drugs.	12	Summary
13	Anticancer drugs	13	Pituitary hormones. Glucocorticoids.
14	Summary	14	Antidiabetic drugs. Drugs for osteoporosis and hormonal contraception.
15	Analgesic drugs – introduction. Opioids.	15	Summary
