

Nr Date	Clinical classes	Seminars	Lectures
04.10.22	<p>Internal Rules and Regulations of Department of Conservative Dentistry with Endodontics. Basic principles of asepsis and infection prophylaxis in the dentist's office and the rules of conduct aimed at minimizing the risk of exposure of healthcare personnel to infections. Operator and the environment of dental practice according to ergonomics.</p> <p>Clinical classes: conservative procedures</p>		1. Etiology and diagnostics of pulp diseases.
11.10.22	<p><b>Entrance test – knowledge from endodontic preclinical dentistry</b></p> <p>Clinical classes conservative procedures.</p>		2. Minimally-invasive endodontics.
18.10.22	<p>Assessment of knowledge:</p> <p>Histophysiology, etiology and diagnostics of pulp diseases.</p> <p>Clinical classes</p>		3. Etiology and diagnostics of periapical diseases
25.10.22	<p>Assessment of knowledge: Etiology and diagnostics of periapical tissue diseases. Endo -X-Ray-diagnostics.</p>		4. Treatment of reversible pulpitis.

	Clinical classes		
04.11.22	<b>No clinical classes.</b>	<b>Seminar: Etiology, pathogenesis, diagnostics and symptoms of pulp and periapical tissue diseases – clinical aspect.</b>	<b>5. Methods and importance of working length determination.</b>
08.11.22	Assessment of knowledge:  Pulp chamber and root canal system morphology and its influence on endodontic treatment procedures. Morphology and function of endodontium. Primary and secondary endodontic access.  Clinical classes		6. Importance of canal irrigation according to root canal system disinfection.
15.11.22	Assessment of knowledge:  Methods and importance of working length determination.  Clinical classes		7. Traditional methods of root canal preparation.
22.11.22	Assessment of knowledge:  Importance of canal irrigation according to root canal system disinfection.  Clinical classes		8. Modern root canal preparation techniques

29.11.22	Assessment of knowledge:  Traditional methods of root canal preparation  Clinical classes.		9.Root canal obturation techniques – updated view
06.12.22	Assessment of knowledge:  Traditional methods of root canal obturation.  Clinical classes		10. Emergency in endodontics.
13.12.22	Assessment of knowledge: Modern medicaments and materials in RCT.  Clinical classes		11. Complications in RCT.
20.12.22	<b>No clinical classes</b>	<b>Seminar: Preparation and obturation of RC and crown reconstruction – clinical aspect.</b>	12. Retreatment of RCT.
10.01.23	Assessment of knowledge:  Emergency in endodontics. Pain control in endodontics.  Clinical classes		13. Strategies of reconstruction of restoration of endodontically treated teeth.
17.01.22	Assessment of knowledge:  Complications in RCT.  Clinical classes		14. Diagnostics and treatment of tooth resorption.
24.01.22	Assessment of knowledge:  Retreatment of RCT.  Clinical classes.		15.Semester test  <b>10.02.22</b>

27.01.23	Clinical classes
