

Pomeranian Medical University in Szczecin

SYLLABUS of the MODULE (SUBJECT) General Information

Module title: CIINICAL ALLERGOLOGY	
Module type	Clinical allergology
Faculty PMU	Faculty of Medicine and Dentistry
Major	Dentistry
Level of study	long-cycle (S2J)
Mode of study	full-time studies
Year of studies, semester	Year IV, semester VIII
ECTS credits (incl. semester breakdown)	1
Type/s of training	lectures (2h) /seminars (5h)/ practical (3h)
Form of assessment*	<input checked="" type="checkbox"/> graded assessment: <ul style="list-style-type: none"> <input type="checkbox"/> descriptive <input checked="" type="checkbox"/> test <input type="checkbox"/> practical <input type="checkbox"/> oral <input type="checkbox"/> non-graded assessment <input type="checkbox"/> final examination <ul style="list-style-type: none"> <input type="checkbox"/> descriptive <input type="checkbox"/> test <input type="checkbox"/> practical <input type="checkbox"/> oral
Head of the Department/ Clinic, Unit	DR N.MED. IWONA POZIOMKOWSKA-GĘSICKA
Tutor responsible for the module	IWONA POZIOMKOWSKA-GĘSICKA
Department's/ Clinic's/ Unit's website	https://www.pum.edu.pl/wydzialy/wydzial-medycyny-i-stomatologii/zaklad-alergologii-klinicznej
Language	English

* replace ☐ into ☒ where applicable

Detailed information

Module objectives		The dentist should see, understand and solve problems related to morbid hypersensitivity. This concept is commonly and erroneously associated with the mechanism of allergy. However, it has a broader meaning. Describes the episodic and chronic symptoms of response to stimuli tolerated by the general population, which do not result from a specific immune response. Due to the specifics of the dentist's work, particular importance are: non-steroidal anti-inflammatory drugs, antibiotics, latex and materials used in dentistry as well as common environmental factors that are most often allergens that cause symptoms of allergic periodic and perennial rhinitis and asthma, so-called oral allergy syndrome, urticaria and angioedema, and anaphylaxis. Practical knowledge about allergic contact eczema, including changes in mucous membranes and the possible causative role of drugs and materials used in dentistry, is equally important. The dentist should know the principles of the diagnosis of morbid hypersensitivity and the possibilities of prevention in terms of individual patients' good. That is why we present the basic diagnostic techniques and principles of treatment of hypersensitivity symptoms and the possibility of selecting safe substitute drugs (antibiotics, local anesthetic agents and analgesics).
Prerequisite /essential requirements	Knowledge	Knowledge acquired at earlier stages of education with particular emphasis on the following concepts: stimulus, reaction, individual and "normal" reaction, resistance, tolerance, hypersensitivity, allergy, sensitivity, specificity, prediction
	Skills	Applicable to each doctor canon of medical proceedings (physical examination, physical examination, first diagnosis, diagnostic program, final diagnosis, treatment). This also applies to the principles of medical reasoning, taking into account the principle of causality and the ability to correctly logically deduce.
	Competences	Subjective treatment of the patient and care for his individual good and ethos of the profession in line with the message of the Code of Medical Ethics, with particular emphasis on recording: The biggest ethical order for a doctor is the good of the patient - salus aegroti suprema lex esto. Market mechanisms, social pressures and administrative requirements do not absolve physicians from compliance with this principle (Article 2 point 2)

Description of the learning outcomes for the subject /module			
No. of learning outcome	Student, who has passed the (subject) knows /is able to /can:	SYMBOL (referring the standards)	Method of verification of learning outcomes*
U01	diagnoses and treats following skin diseases: infection disease, allergic disease, sexually transmitted diseases	K_E.U14	O
K01	shows habit of self-education and lifelong education	K_K01	O
K02	understands need for keeping professional secrecy and showing respect to patients' rights	K_K09	O

Table presenting LEARNING OUTCOMES in relation to the form of classes							
No. of learning outcome	Learning outcomes	Type of training					
		Lecture	Seminar	Practical	Clinical classes	Simulations	Other...
U01	K_E.U14	X	X	X	X		
K01	K_K01	X	X				
K02	K_K09			X	X		

Table presenting TEACHING PROGRAMME			
No. of a teaching programme	Teaching programme	No. of hours	References to learning outcomes
Summer semester			
Lectures			
TK01	Basic concepts and mechanisms: individual and "normal" way of reacting, individual hypersensitivity and tolerance, allergic and non-allergic hypersensitivity.	1	K01, U01
TK02	Diagnosis of allergic diseases. Ways to identify the stimulus that causes the reaction. Basic techniques for the detection of IgE-mediated and non IgE-mediated allergies. Open and placebo controlled provocation tests. Skin prick test and sIgE. Patch test	1	K01, U01
Seminars			
TK01	Undesirable events and reactions associated with the use of local anesthetic agents, antibiotics and non-steroid anti-inflammatory drugs.	1	K01, U01
TK02	Allergic and non-allergic anaphylaxis.	1	U01
TK03	Allergic rhinitis and bronchial asthma.	1	U01
TK04	Hypersensitivity reactions to medicines and implants regarding the skin and mucous membranes.	1	U01

TK05	Angioedema. Familial angioedema.	1	U01
Clinical classes			
TK01	Presentation of cases: Consequences of confusing the terms "allergy" and "hypersensitivity". Neurotoxic reaction to lidocaine or „mental illness”? Neurotoxic reaction to lidocaine or hypersensitivity to sulfite which preservative epinephrine?	1	U01, K02
TK02	Presentation of cases: Anaphylactic reactions to cefuroxime. Typing a replacement antibiotic. Anaphylactic reactions to metamizol. Typing a replacement medication. Anaphylaxis to” venflon “ or nocebo effect?	1	U01, K02
TK03	Presentation of cases: A patient with allergic rhinitis Patient with OAS (oral allergy syndrome). A patient with exacerbation of bronchial asthma. A patient with allergic contact eczema. Patient with skin-induced allergic reaction	1	U01, K02

Booklist

Obligatory literature:

1. Adverse events in anaesthesiology. Why do not we recognize anaphylaxis?**Kurek M and others.**

An overview article is available on the website of the Department of Clinical Allergology.

http://allergy.szczecin.pl/images/Pliki/materialy_pomocnicze/2017/Dlaczego_nie_roz_anafilaksji.pdf**2. Allergic and non-allergic hypersensitivity to antibiotics Kurek M and others.**

Development for teaching purposes available on the website of the Department of Clinical Allergology

http://allergy.szczecin.pl/images/Pliki/materialy_pomocnicze/2017/Dlaczego_nie_roz_anafilaksji.pdf

Supplementary literature:

1. Critique of impure reason_ medicine based on scientific evidence and common sense**James Michelson.** 2003; Journal of Evaluation in Clinical Practice, 10, 2, 157-161**2. Epistemological issues in medicine based on scientific evidence**

Benjamin Djulbegovic and others. Cancer Control 2009, Vol. 16, No. 2; 158-168

Student's workload	
Form of student's activity (in-class participation; activeness, produce a report, etc.)	Student's workload [h]
	Tutor
Contact hours with the tutor	8
Time spent on preparation to seminars/ practical classess	3
Time spent on reading recommended literature	2
Time spent on writing report/making project	
Time spent on preparing to colloquium/ entry test	2
Time spent on preparing to exam	
Other	
Student's workload in total	16
ECTS credits for the subject (in total)	1
Remarks	

* Selected examples of methods of assessment:

EP – written examination

EU – oral examination

ET – test examination

EPR – practical examination

K – colloquium

R – report

S – practical skills assessment

RZC – practical classes report, incl. discussion on results

O – student's active participation and attitude assessment

SL – lab report

SP – case study

PS - assessment of student's ability to work independently

W – entry test

PM – multimedial presentation
