

Department's Internal Didactic Regulations

valid from academic year	2025/2026
full name of the Department	Department of Biology, Parasitology, and Pharmaceutical Botany
contact to the Department (e- mail. phone no.)	e-mail: biologia@pum.edu.pl ; phone no: 91-466-1672
Head of the Department (academic title, name and surname)	Prof. Danuta Kosik-Bogacka, DSc, PhD
Didactic Responsible/ Course coordinator (academic title, name and surname, e-mail, phone no.)	Karolina Kot, PhD e-mail: karolina.kot@pum.edu.pl Phone no: 91-466-1672
field of study/major	medicine
year of studies	2 year
course/subjects title	Parasitology

§1

Methods of Teaching

1. The course "Parasitology" includes 10 hours of practical classes, which take place at the Department of Biology, Parasitology, and Pharmaceutical Botany.
2. Students are required to wear their ID badges in a visible place.
3. Students must attend classes and assessments only with the group to which they have been assigned. Exceptions to this rule require documented justification and the consent of the teacher conducting the classes. Consent must be obtained at least one day before the scheduled class.
4. Recording or filming the course without the teacher's permission is prohibited.

§2

Mode and forms of compensation of missed activities

1. Attendance at practical classes is mandatory.
2. Each absence must be justified with a medical certificate or a dean's excuse within one week of the absence. **One justified absence** is allowed.
3. With the teacher's consent, a missed class may be made up during the same week with another student group.
4. If a missed class is not made up, the student is required to learn the material independently. Knowledge of the missed material will be assessed during the next class, either in written or oral form. Additionally, the student is required to independently prepare the class documentation (parasite drawings).
5. Absence from **two classes** or failure to justify an absence will result in being disqualified from the final assessment. Cases in which the allowable number of absences is exceeded due to prolonged illness will be considered individually,

and the decision will be made by the Head of the Department or in consultation with the Dean/Vice-Dean of the Interfaculty Centre for English-Language Education.

§3

Conditions and methods for admitting students to final course assessments and examinations

1. The condition for being admitted to the final assessment is obtaining approval of the completed tasks (parasite drawings) in the exercise notebook during each class, as well as receiving a passing grade in practical parasite identification and entry tests.

§4

Conditions for allowing students to take part in classes

1. Students are required to arrive on time for classes. Being more than 15 minutes late will be considered an absence.
2. Students are expected to come prepared with the material designated for each class, as knowledge may be assessed through an entry test.
3. Each student is required to maintain written and graphical documentation of the practical part of the class. This documentation will be regularly checked, so students must bring their exercise notebook to every class. Documentation on electronic devices will not be accepted.
4. During the classes, an outfit adapted to the place and circumstances is required. There are generally applicable rules of behavior and dress. It is not required to come to the class in medical aprons and replacement shoes. An official uniform is required for the final test.
5. A student may be denied entry to or removed from class in the event of inappropriate behavior that violates the study regulations or other university policies, disrupts the class, poses a threat to health, life, or property, or demonstrates gross disrespect toward the instructor or other participants.
6. Being denied entry to or removed from class in the cases mentioned above is considered an absence.

§ 5

Conditions and means for conducting partial course assessments (including the number of retake opportunities for such assessments)

1. Partial assessments and any entry tests are conducted during practical classes.
2. During the final class, there will be a practical assessment involving the identification of parasites on slides (5 slides, time: 10 minutes; both the correct species name (latin name) and developmental stage of the parasite are graded, with no points awarded for identifying only the developmental stage).
3. To pass the partial tests, a student must obtain at least 60% of the total possible points. The score is converted into a grade.
4. It is not possible to retake partial tests to improve a passing grade.
5. A maximum of three attempts are allowed for each partial assessment (including two resits). The date of the first attempt is included in the class schedule available on the Department's website. Resit dates will be arranged with the academic teacher.

§6

Conditions and means for conducting final course assessments and exams

1. A condition for being admitted to the final test-based assessment is obtaining a passing grade (minimum 60% correct answers) in practical parasite identification and any entry tests, at least one week before the final test date.
2. The final grade for the course *Parasitology* is based on the result of the final assessment.
3. The final assessment is a single-choice test (40 questions, time: 40 minutes).
4. An unexcused absence from the final assessment or from scheduled resit sessions is equivalent to a failing grade. Justification for absence from the final assessment must be submitted by the student or an authorized representative within one week from the scheduled date of the final test.
5. Students may retake the final test twice. At the request of the Head of the Department or students taking the second resit, the final assessment may be conducted as a board examination. In exceptional cases, the Head of the Department may schedule a third resit. General rules for the board examination are defined in the Rector's Regulation.
6. The results of the final assessment will be made available to students through the university's online system (Virtual Dean's Office) within 5 working days from the date of the assessment.
7. During partial and final assessments, students are prohibited from possessing electronic devices that allow communication with others. Behavior suggesting the possession of such devices, or confirmation of their presence during assessments, will result in consequences as described in the "Study Regulations of PUM in Szczecin."

§7

Conditions for exemption from some final course assessments or exams

1. Not applicable

§8

Forms of admission to the pre-scheduled examination

1. Not applicable

§9

Assessment criteria

1. The point-based grading scale used for the practical partial test is as follows: 3 pts – 3.0 (pass); 3.5 pts – 3.5 (satisfactory); 4 pts – 4.0 (good); 4.5 pts – 4.5 (above good); 5 pts – 5.0 (very good).
2. To receive a passing grade in the final single-choice test assessment, a minimum of 60% correct answers is required. The following point-to-grade scale applies: 24–26 points: 3.0 (sufficient); 27–29 points: 3.5 (fairly good); 30–33 points: 4.0 (good); 34–36 points: 4.5 (more than good); 37–40 points: 5.0 (very good)

**§10
Additional**

if specific nature of the subject requires extra information, please add it as a next
points of this Regulations

1. Any matters not covered by the regulations will be considered upon written request submitted by the interested party to the office of the Department of Biology, Parasitology, and Pharmaceutical Botany.
