

STUDENTS SCIENTIFIC CLUB „ STO - MATER – FIZ”

The STO - MATER - FIZ Student Research Group at the Department of Propaedeutics, Physico-diagnostics and Dental Physiotherapy cordially invites all interested and willing to work students who want to gain knowledge and skills related to:

- stages of the research process
- formulating research goals and problems
- skilful searching for scientific literature
- writing articles

Students in our club actively participate in the research work of the unit, present their reports during many conferences and trainings. Cooperation with experienced employees of the Team allows you to develop practical skills in working with a group, communication, and the functioning of scientific and clinical institutions.

SUPERVISORS OF THE RESEARCH CLUB

SECTION	TEACHER
Section for physical diagnosis and dental physiotherapy	Dr hab. n. med. Danuta Lietz - Kijak
Section for dental materials science	Dr n. med. Helena Gronwald
